

NO MORE
HEAVY LIFTING
OF WHEELS!

GET THE WHEELS UP AT OPTIMAL WORKING HEIGHT

Wheel Buddy is the perfect cart when mounting and dismounting wheels. The cart is intended for 1-4 wheels.

The gain by using Wheel Buddy is, that it is possible to lay off wheels in a good working height and thereby avoid heavy lifting from and to the floor.

The lifting frame of AHCON Wheel Buddy raises and lowers in relation to the load.

Thereby a maximum of good ergonomic is ensured – whether you have 1 or 4 wheels on your Wheel Buddy, as the upper wheel always will be placed in an ergonomic working height.

The cart is equipped with a practical perforated plate, that can be mounted with hooks for the hanging of all necessary tools for wheel change. Moreover Wheel Buddy includes a storage place for bolts.

AHCON Wheel Buddy is also the perfect “parking spot” for wheel when doing mechanical work.

FEATURES

- The upper wheel is kept in a perfect working height
- No harmful lifting of wheels to or from the floor
- Space saving storage of wheels during service tasks
- Easy to manoeuvre around the workshop
- If you have several Wheel Buddys in the workshop they can be pushed together, when not being used
