

SAFE INFLATION OF EXTRA LARGE WHEELS

OTR 2000 is a safety inflation cage for tractor-, EM- and truck wheels.

The Safety inflation cage is available as a basic version, mountable with various equipment – including a sliding door on the side, easing the access to the pump nipple and wheel inspection. The cage can also be ordered as a fully equipped version including a full automatic computer inflator and other types of equipment.

OTR 2000 appears as a stunning, simple and streamlined inflation cage with top safety.

The size of OTR 2000 has been adjusted to fit the remaining range of safety inflation cages – including TBR 1200 for truck wheels and MAXI SAFE for the largest wheels.

FEATURES

- High safety during inflation of tractor-, EM- and truck wheels
- Manufactured in DUPLEX wire mesh
- Order the basic cage and fit with the equipment listed below – alternatively the cage is also available in a fully equipped version
