

AVOID HEAVY LIFTING BY INSPECTION OF LARGE WHEELS

Do inspection and repair on large wheels without any heavy lifting!

Tyre Spreader TS 9000 is an ergonomic and clever piece of equipment for inspection and repair of truck-, tractor-, and EM-tyres.

TS 9000 is designed with a very user-friendly lifting device with pneumatic raising and lowering function.

This way the job can be done at an optimal working height.

The tyre spreader is equipped with an integrated halogen lamp, which makes it easy to inspect the tyre and localise any damages thanks to its bright light.

FEATURES

- Inspection and repair of truck-, tractor-, and EM-tyres
- Possible to do inspection and repair in an ergonomic height
- Offers a working height of 895 mm
- Get the optimal light with the inspection lamp
