

# WHEEL TROLLEY RECYCLED EV

## THE PERFECT WHEEL TROLLEY SIZE FOR LARGE ELECTRIC CAR WHEELS

The average wheel size has grown several inches bigger during the last years – among others because of a growing number of electric cars in the streets.

Of that reason we have added a new size to our Wheel Trolley family: The Wheel Trolley Recycled EV, which has a diameter and lifting capacity suitable for the transport of wheels from electric cars and large passenger cars.

All features have stayed the same as with the other models where we know that the high degree of durability is of great importance.

### FEATURES

- The perfect choice for EV wheels and other large wheels
- Made of excess material from the car industry and recycled parts from damaged cars
- Available both with and without wheel brakes
- Compatible with AHCON Wheel Trolley Lift and AHCON Wheel Trolley Tower Lift when changing the lifting plates on the lifts
