

ELECTRO HYDRAULIC BATTERY LIFTING TABLE

Q-LINE ELECTRO-HYDRAULIC BATTERY LIFT TABLE FULLY ELECTRIC BATTERY TABLE FOR HEAVY EV TASKS WITH ELECTRIC MOVER

When heavy battery packs need to be handled safely and efficiently, the Q-LINE EV1500 is the obvious choice.

With a lifting capacity of 1500 kg and fully electric adjustment of both height and angle, you get a solution that matches the requirements of modern auto workshops – especially when it comes to electric and hybrid cars.

The electric mover makes it easy to manoeuvre the table around the workshop, even with heavy loads.

The table can be adjusted in length and height, giving you maximum flexibility in your work.

The EV1500 is an investment in safety, ergonomics and efficiency – and comes in a budget-friendly setup without compromising on functionality.

FEATURES

- Ideal for safe and efficient handling of heavy battery packs
- Fully electric angle and height adjustment
- Electric mover makes the table easy to manoeuvre, even with heavy loads
- The table can be adjusted in length and height for maximum flexibility
- Designed for the demands of modern auto workshops – especially electric and hybrid cars
